

THE POWER OF NURSES 2026

On May 12, we'll say happy birthday to Florence Nightingale, one of the original nursing **SUPERHEROES!**

That legacy continues here at Our Little Haven with Nurse Shari.

"As a nurse, I've had the opportunity to practice across the full scope of pediatric nursing environments, from pediatric home health to inpatient hospital to office practice, all while caring for medically complex children. But nursing has been more than a career for me—it's been a generational experience spanning at least four generations. You could say nursing chose me!

I am optimistic that Keystone Mental Health at Our Little Haven will continue to **CHAMPION** the future of nursing and its evolving landscape with compassion, professionalism, and **SUPERHERO** excellence.

And like Keystone's mission, I, as a **CAPED CRUSADER** of a nurse, am relentlessly committed to providing exceptional nursing care in improving the mental health and well-being of all our children, one healthy, **HEROIC** family at a time!

THE POWER OF NURSES 2026
